OUR FUTURE

“  
*In a rapidly changing educational landscape, Academy faculty must remain life-long learners and reflective practitioners. Funding for professional development and the piloting of innovative and engaging curricular initiatives is vital the excellence of the classroom experience for our students.*

Stephanie Lipkowitz,  
Associate Head of School

## ACADEMY FUTURE FUND **Goal: \$200,000**

**A**t Albuquerque Academy, labels and boundaries don't apply. Like our teachers, Academy students are world-class artists and athletes, scholars and explorers. The Academy is one of the top schools in the country, and we set each student on their own life-long path of learning and doing.

The Academy Future Fund will allow for innovative initiatives in curriculum, pedagogy, and programs to be explored, providing maximum flexibility for our school to be a nimble, visionary leader in education.

With the arrival of new Head of School Julianne Puente in July 2020, this fund will help her, along with faculty and staff, bring new ideas to our ever-adapting program. Simply put, this fund will turn dreams into reality as the school enters a new era. In the past, such funds have supported initiatives like inviting professionals to visit and teach master classes, exposing students to various careers, and providing them with new perspectives and inspirational knowledge. Given the rapid pace of innovation in education these days, we envision this fund will also support professional development for our teachers as they preserve the strength of our past while adapting to the future. We hope to have this fund available for Julianne's use right away to support her fresh ideas.

Donors who wish to provide the school with maximum flexibility will ensure a legacy of forward-looking behavior and readiness for the future, supporting initiatives that allow students to grow to understand the greater world and how they can go out and serve it with wisdom, conviction, and compassion.
